MADE IN JAPAN

We do not use machines to produce all our products, and we make by a hand in the all processes except the forging process that are firstly formed into rough scissors.

Please listen to the sound of our scissors close to your ear, and also listen to the sound of the scissors not made in Japan. When you listen to the sound of ours, we are sure that you will say, "Fantastic!"

## FEATURES OF OUBI SCISSORS

In the same automobile manufacturer, car model is different depending on the purpose, and also there are grades in the same car model.

Scissors has also sorts and grades.

Regarding scissors, sorts of scissors are different depending on the breed of dog and depending on the cut part. The durability, materials and fitness are worth the grades.

- Mini scissors (BO)  
Use to cut fur around ears and legs
- Thinning scissors (SU)  
Use to cut back' s fur to show naturally
- Cut scissors (CU)  
Use to cut fur all together
- P Series  
This P series is used the stainless steel made in Japan, but not used high quality materials and this is pursued only the cutting quality.
- IN Series  
Used the high quality stainless steel made in Japan, this is manufactured without taking cost for user from a beginner to an expert.
- α Series  
This is also made of Japanese high quality stainless steel and only limited veteran craftsmen take time to make this series. This is particular about the details such as the cutting quality, durability and fitness.
